career objective

Dedicated and focused engineering student with a passion for programming, problem solving and challenges! My greatest strengths is the willingness to learn new things and my social capacity. Previous work experience as a developer, IT-technician, retail seller, cashier and functionary of the sections committee responsible for the contact and cooperation with companies.

Looking for a position where I can further develop my skills in programming and problem solving, as well as get the opportunity to learn new technologies. In teams I am cheerful, initiative and cooperative, with a great commitment and hunger for new challenges.

education

2014–2019

Master of Science in Computer Engineering Faculty of Engineering LTH, Lund University
Expected graduation in June 2019

The education in Computer Engineering aims to meet the demand for engineers who are developing advanced computer technologies, systems and applications.

2011–2014

High school in Technology Program

Polhemskolan, Lund

The Technology Program is intended for students who want to work with problem solving and developing technology. This program lays the foundation for studying technology and the natural sciences in further education.
